

## Geofoam No. 5012

**Subject:** Specialty Compressible Application of Geofoam

**Date:** October 2015 (Revised January 2019)

ThermaFoam R-Control Geofoam is manufactured in conformance to ASTM D6817, "Standard Specification for Rigid Cellular Polystyrene Geofoam." This standard covers the material properties most often required for geofoam applications. For most applications, long-term design loads should not exceed the linear elastic range of ThermaFoam R-Control Geofoam which is equal to the compressive resistance at 1% deformation.

However, in some specialty compressible applications the compressive resistance at 5% and 10% deformation may be applicable. The following Table provides the compressive resistance at 5% and 10% deformation for ThermaFoam R-Control Geofoam.

ThermaFoam R-Control Geofoam Properties for Compressible Applications								
PRODUCT								
		12	15	19	22	29	39	46
Compressive Resistance <sup>1</sup> @ 5% deformation, min.	psi psf (kPa)	5.1 730 (35)	8.0 1150 (55)	13.1 1890 (90)	16.7 2400 (115)	24.7 3560 (170)	35.0 5040 (241)	43.5 6260 (300)
Compressive Resistance <sup>1</sup> @ 10% deformation, min.	psi psf (kPa)	5.8 840 (40)	10.2 1470 (70)	16.0 2300 (110)	19.6 2820 (135)	29.0 4180 (200)	40.0 5760 (276)	50.0 7200 (345)
ASTM D6817 Compliance, Type		EPS12	EPS15	EPS19	EPS22	EPS29	EPS39	EPS46

<sup>1</sup> See ASTM D6817 Standard for test methods and complete information.

The compressive resistance at 5% and 10% deformation for ThermaFoam R-Control Geofoam should be used only when specified by an engineer specifically for a specialty compressible application.
